I watched* Black Mirror
(season 2, episode 4)
and I like the episode so much.
I couldn't ® stop watching!
In the first moment I didn't understand
but as the episode progress I started
liking it*, it talks about a technology*
That* places a chip* in the person's
brain* and records* all memory, after
that, it's* created a type of Alexa but
this Alexa is your memory.

In the middle of the episode, Joe talks*
about his story* and his* ex-father-in-law and
his* supposed daughter, who, in the end,
is not his daughter, but* his* friend's.
and we* discover that the police* used
another* man to interrogate him* and discover
all truth, and this man who discovered did a lot of
wrong things and* was blocked on that chip
for everyone
